43.	Contract Term	MPPCL	Concerning the duration of the contract, specifically if the target year is 2039 but the 15-year contract starts from the delivery date. If the ERC approval is delayed by a year, for example, would the 2039 deadline extend to 2040? Would this align with the DU's PSPP? Under the PSPP, there is a timeline requirement for conducting the next CSP due to demand projections. In most CSPs they've participated in, the deadline is fixed. However, based on the response, the deadline seems flexible. Their concern is whether the ERC and DOE would allow such flexibility. In the worst case, the delay could last up to two years, with no approval in sight		Following the prevailing ERC regulations, Physical PSAs have a maximum term of 15 years reckoned from the commencement of supply. Accordingly, the contract Term per Member EC would start from the delivery date, and adjustments on the expiration of the resulting PSA shall be made accordingly. Further, the PSPP for the following years of the Member ECs will reflect the CSP conducted by NEA. Once the resulting PSA from the CSP is approved by the ERC, the capacity of the Member ECs, specifically the bilateral contract quantity for the baseload demand, will be reflected in the respective PSPPs of the Member ECs.
44.	Schedule 17	TVI	On the non-fuel commodity cost row in the Standard Response Form, what should they do if their costs exceed the six available slots? Can this be accommodated for their other costs?		The Non-Fuel Commodity Cost row shall be revised to include fifteen (15) slots.
45.	Reduction in Contract Capacity Protocol	TLI	The most expensive supplier today may not remain the most expensive in the future, and reducing the contract solely for one supplier would be unfair. Proration would maintain balance, so if prices decrease, the effect is proportionate, and the price remains distributed across the GenCos. This would ensure that any reductions affect all suppliers equally, rather than burdening only one. They also mentioned that this shared approach would distribute uncertainty more fairly.

1.	Section 5. Performance Bond	GNPD	**Pre-bid Conference:** While the Seller is required to post a Performance Bond, the Seller shall also be granted to require the Buyer to submit a Security Deposit in case of payment default. **LECA Response:** This concern shall be submitted to the NEA-SBAC for deliberation. **Additional Comments:**	Disallowing bidders from imposing a security deposit may force them to include a premium to cover their risk. This could lead to higher bid offers, ultimately affecting all the Buyers. However, if a security deposit is allowed, it could result in a more favorable rate that applies for the entire contract duration.
